## **ID LOCATOR SERVICE**

Serving Palm Beach, Martin & St. Lucie Counties

(561) 683-2700

Alzheimer's Community Care's ID Locator Service provides education and resources to ensure the safety of patients diagnosed with Alzheimer's disease or related neurocognitive disorders who are at risk of wandering. To participate in this service, the patient must meet the following criteria:

- Is at risk of wandering
- Have a diagnosis of probable Alzheimer's disease or related neurocognitive disorder
- Complete an evaluation with an Alzheimer's Community Care Family Nurse Navigator

### **Benefits of the ID Locator Service**

- Proven safety tools provided for the patient and caregiver at little or no cost
- Provides caregiver relief in knowing that their loved one is equipped with a safety measure
- Dementia-specific education and training to ensure the safety of the patient
- Longstanding partnerships between Law Enforcement Agencies and Alzheimer's Community Care to assist in a wandering event
- Access to other dementia-specific services and resources offered by Alzheimer's Community Care

HF IMF R'S

An estimated **5.8 million** Americans have Alzheimer's disease

**70% of patients** are being cared for by family members in their homes, and are at risk to wander at some point

**80% of patients** not found within 72 hours may not survive an elopement event

#### **Tips & Strategies for Wandering Prevention**

- 1. Keep routine for the patient. It provides structure.
- 2. Offer favorite activity to prevent restless periods.
- 3. Ensure basic needs are met. Does the patient need to use the bathroom? Is the patient hungry or thirsty, bored or tired?
- 4. Install locks at the top or bottom of the door so they remain out of the line of sight.
- Use loose-fitting doorknob covers to inhibit opening, install chimes to signal when a door has been opened; install safety devices to limit how much windows and sliding glass doors can be opened.
- 6. Secure garage doors, pool gates and fence gates that may lead to potential dangers. Patient may be attracted to water.
- 7. Place "STOP", "DO NOT ENTER" or "CLOSED" signs on the door or camouflage the door with scenic posters or wallpaper.
- 8. Keep shoes, car keys, coats, hats and/or other signs of leaving out of sight.
- 9. DO NOT leave a patient who has previously wandered unattended.
- 10. Call to consult with a Family Nurse Navigator.

# **PROVEN SAFETY TOOLS**

#### **Medical ID Bracelet**

A stainless non-tracking technology bracelet embossed with Alzheimer's Community Care's logo and the recognized Medical Alert symbol. Each bracelet has a unique identifying code and a 24/7 number which links to vital information.

#### For Patients:

· Living alone; and/or taking public transportation to the Organization's Day Center

If you encounter a patient wearing a Medical ID Bracelet, please ensure their safety.

#### **Electronic Locator Devices**

Radio Frequency: (RF)

#### For Patients:

- With a full-time caregiver;
- Able to walk or self-propel a wheelchair;
- Have wandered from a supervised setting or exhibit exit seeking tendencies; and/or
- are experiencing anxiety, increased confusion or agitation due to a change in environment.

If you encounter a patient wearing a Radio Frequency Bracelet or GPS device, please call 911.

#### **Door Alert**

A portable motion sensor that alerts a caregiver of a potential exit.

#### For Patients Enrolled with the RF or GPS Locator Device

In order to obtain any of the above listed safety tools, the patient must meet eligibility requirements. For more information, please call **(561) 683-2700.**
